

The Source Contributes to Model State Legislation to Prohibit Anticompetitive Healthcare Contracts

In connection with the Source's research and findings on anticompetitive contract terms, Senior Health Policy Researcher Katie Gudiksen co-authored the NASHP [model legislation](#) for states to rein in the use of these contract terms, including all-or-nothing, most-favored nation, anti-steering/anti-tiering, and gag clauses. A companion report, [A Tool for States to Address Health Care Consolidation: Prohibiting Anticompetitive Health Plan Contracts](#), further details the contract terms and how the model act can give states essential tools to create a more level playing field and help rein in rising health care costs.

For more information and details on the anticompetitive contract terms, visit the Source [Provider Contracts](#) interactive key issue page.
